

Sample Compatibility Verification Record

A redacted example for validating coding, DDM visibility and link behavior on the buyer's platform.

ILLUSTRATIVE / REDACTED SAMPLE - NOT A CUSTOMER CERTIFICATE

Verification target

Field	Recorded value
Buyer platform	[REDACTED SWITCH MODEL]
Software / firmware	[REDACTED VERSION]
Port mode	100G Ethernet - illustrative
MingApex quoted P/N	[REDACTED]
Reference OEM P/N	[REDACTED]
Serial numbers	[REDACTED]

Observed outputs

Observation	Expected	Illustrative record
Module recognized	Correct type and reach	PASS
Vendor / P/N fields	Match approved coding profile	PASS
DDM readings	Temperature, voltage, Tx/Rx power visible	PASS
Link state	Up with no unsupported-transceiver alarm	PASS
Traffic test	No packet loss at agreed duration/load	PASS
Hot-plug cycle	Stable recognition after repeated insertion	PASS

Evidence to attach

CLI screenshots, DDM output, traffic-generator summary, test topology, module label photo and the tested switch/line-card identification. Buyer-specific command output should be redacted only where it exposes network names, IP addresses or account details.
